Job Description:

As a Manual Tester, you will be responsible for ensuring the quality of our projects through manual testing. You will play a crucial role in identifying defects, performing test cases, and ensuring that our products meet the highest standards before they go live.

Responsibilities:

- Develop and execute test cases based on project requirements and technical specifications.
- Perform functional, regression, and integration testing on various applications.
- Identify, document, and track defects using defect management tools.
- Collaborate with developers to understand product functionality and provide feedback for improvements.
- Create and maintain detailed test documentation, including test plans, test cases, and test reports.
- Perform cross-browser testing to ensure application compatibility.
- Continuously improve testing processes and propose solutions for process improvements.
- Participate in team meetings and contribute to project planning.

Requirements:

- 6 months to 1 year of experience in manual testing.
- Bachelor's degree in Computer Science, Engineering, or a related field.
- Basic understanding of Software Development Life Cycle (SDLC) and testing methodologies.

- Familiarity with bug tracking tools (e.g., JIRA).
- Knowledge of writing and executing test cases.
- Strong attention to detail and ability to identify potential issues.
- Good communication and teamwork skills.
- Ability to work independently and meet deadlines.
- Experience in API testing and performance testing is a plus.
- Knowledge of Automation Testing is a plus.

Benefits:

Paid leaves, professional development opportunities, etc.
